The following is an **Examiner's Statement of Reasons for Allowance**:

Claims 1-4, 12-38, 43 and 46-47 are directed to a cytochrome C-reporter fusion construct comprising :

(a) a modified cytochrome C protein derived from wild type human cytochrome C represented by SEQ ID NO:2 and

(b) a fluorescent protein,

wherein said fusion protein targets the mitochondria and has a reduced ability to induce apoptosis in a living cell, and

wherein said modified cytochrome C comprises the amino acid substitution selected from the group consisting of K73A, K73L, K73R, K73G and K73X, wherein X represents trimethylation, a nucleic acid sequence encoding said fusion construct, host cells stably transformed with said nucleic acid a method of detecting apoptosis in a living cell comprising the steps of:

(i) culturing a cell transformed to over-express said fusion construct and

(ii) determining the localization of said fusion construct within the cell with time;

wherein a change in localization of the fusion construct within the cell is indicative of apoptosis.

Claimed fusion construct is free of prior art. Further the prior art fails to suggest such specifically claimed construct. Hence, said construct is also non-obvious. Since said fusion construct is both novel and non-obvious, a nucleic acid sequence encoding said construct, vectors and host cells comprising said nucleic acid sequence, and a method of use of said fusion construct as claimed are also novel and non-obvious.

**Claims 1-4, 12-38, 43 and 46-47 are allowed.**
